40kW & 65kW Electric Aircraft Charger

Mini Cube

Mini Cube is designed as a self-contained, Level 3-DC Fast Charger for use with all CCS vehicles including aircraft, cars, buses, trucks, and vans, available in 40kw and 60kw ratings. Integrated caster wheels let you easily move Mini Cube to where it is needed to charge a vehicle and conveniently store it out of the way when not in use. Mini Cube's unique design provides storage for the AC power cable and the DC charging plug, keeping your hangar clean and presentable while minimizing trip hazards.
Site Grid Connection

Not to scale

| Outlet | Up to 30 ft
 AC Power | Mini Cube | Up to 15 ft
 DC Power | Aircraft |

Mini Cube

40kW & 65kW All-in-One Level 3 DC Fast Chargers

Mini Cube Specifications

	Mini Cube	Mini Cube+
Protocol	CCS1	CCS1
Continuous Output Current	60 A	100 A
Maximum Output Voltage	1,000 VDC	1,000 VDC
Cable Length	30 & 15 ft	30 & 15 ft

	Mini Cube & Mini Cube +
Dimensions	30.5 in x 30 in x 26.5 in
Weight	290lbs
Communication	OCPP 1.6
User Interface and Payment	iOS and Android App

Inverter AC Input Specifications

Mini Cube Inverter		
Frequency	50 Hz	60 Hz
Input Voltage	400 V	480 V
Input Amperage	60 A	50 A
Phases	3 Phase + Ground	

Mini Cube+ Inverter		
Frequency	50 Hz	60 Hz
Input Voltage	400 V	480 V
Input Amperage	100 A	80 A
Phases	3 Phase + Ground	

Connectivity

Mini Cube's integrated WiFi connectivity automatically connects your charger to BETA's Mobile App and remote monitoring system. Through the BETA App you can check the availability of the charger, start and stop charging sessions, and optionally collect payment for charging. Connection to BETA's Remote Monitoring System enables remote technical support from BETA engineers if any issues arise.
